

Lunea

U52

A rounded end cap designed to finish back-to-back Profim Lunea configurations. It gives the modular sofa a soft, sculptural form and creates an elegant visual finish. The module must be used as part of a larger arrangement and can be combined with U11, U22, U23, U31, U32, U41 or U42 modules. It is well suited to representative lounge areas, reception spaces, hotels, cafés and other HoReCa interiors.

Collection features:

- Modular seating system designed for architectural planning across workplace, hospitality and public interiors.
- Scaled from +10 cm to +80 cm in 10 cm increments to support cleaner layouts, stronger symmetry and more efficient space planning.
- Raised on slender powder-coated metal legs, giving the system a visually lighter and more architectural appearance than traditional modular seating.
- Rounded geometry creates a softer, more welcoming atmosphere.
- Flexible configurations ranging from compact corner layouts to large open-plan arrangements all within one coherent visual language.
- Integrated accessories include LN78 tables, tablet arms, Mediaport power access and planter modules.
- Back-to-back configurations allow efficient zoning in open environments.
- Dual upholstery option allowing different colours of the same fabric on the seat and backrest.
- Certified to Möbelfakta, EN 16139, EN 1021-1&2 and BS 5852 Crib 5 standards.
- Originally developed for Stylex (Flokk Group, USA) — a proven modular platform refined for the European market.
- Profim Lunea can be used by persons weighing up to 130 kg.

Technical specifications:

Product version U52
